

Listing of the Claims:

The following is a complete listing of all the claims in the application, with an indication of the status of each:

- 1 1. (Currently Amended) A portal site data providing device for reading an
2 ID from a portable terminal, receiving a user-input portal specifying
3 information and storing in a reversibly removable memory medium of the
4 portable terminal a portal site address for the portable terminal to
5 subsequently access a portal site built according to the user-input portal
6 specifying information, comprising:
7 a data reading/writing device for reading/writing data from/to the
8 reversibly removable memory medium, arranged for mounting the memory
9 medium which is reversibly removable from the portable terminal, and
10 arranged to read the ID from the portable terminal;
11 a portal specifying information receiving device for receiving a user-
12 input portal specifying information specifying user selection from among a
13 plurality of portal site content options; and
14 an address data storage communication device for transmitting the
15 user-input portal specifying information to an external portal address data
16 storage apparatus and for receiving, from the address data storage apparatus
17 a corresponding user-specific portal site address data indicating an address
18 for the portable terminal to subsequently access the portal site specified by
19 the user-input portal specifying information,
20 wherein the data reading/writing device is arranged to store the
21 corresponding user-specific portal site address data appended to the ID read
22 from the portable terminal in the memory medium of the portable terminal.
- 1 2. (Previously Presented) The portal site data providing device of claim 1,
2 further comprising:
3 a display device for displaying portal contents information showing

4 the contents of various portal sites, the display device being arranged to
5 read the portal contents information from a portal contents information
6 storage apparatus in which the portal contents information is stored in
7 advance.

1 3. (Previously Presented) The portal site data providing device of claim 1,
2 wherein

3 the portable terminal is a GSM-type portable telephone, and the
4 memory medium of the portable terminal is a SIM card.

1 4. (Previously Presented) The portal site data providing device of claim 2,
2 wherein the portal contents information stored in the portal contents
3 information storage apparatus is information regarding various websites
4 which can be accessed in advance through the portal site.

1 5. (Currently Amended) A portal site data providing device for reading an
2 ID from a portable terminal, receiving a user-input portal specifying
3 information and storing in a memory medium of the portable terminal a
4 portal site address for the portable terminal to subsequently access a portal
5 site built according to the user-input portal specifying information,
6 comprising:

7 a data reading/writing device for reading/writing data from/to the
8 memory medium of the portable terminal, the data reading/writing device
9 arranged to read the ID from the portable terminal;

10 a portal specifying information receiving device for receiving a user-
11 input portal specifying information specifying user selection from among a
12 plurality of portal site content options; and

13 an address data storage communication device for transmitting the
14 user-input portal specifying information to an external portal address data
15 storage apparatus and for receiving, from the address data storage apparatus

16 a corresponding user-specific portal site address data indicating an address
17 for the portable terminal to subsequently access the portal site specified by
18 the user-input portal specifying information,

19 wherein the data reading/writing device is arranged to store the
20 corresponding user-specific portal site address data appended to the ID read
21 from the portable terminal in the memory medium of the portable terminal.

1 6. (Previously Presented) The portal site data providing device of claim 5,
2 further comprising:

3 a display device for displaying portal contents information showing
4 the contents of various portal sites, the display device being arranged to
5 read the portal contents information from a portal contents information
6 storage apparatus in which the portal contents information is stored in
7 advance.

1 7. (Previously Presented) The portal site data providing device of claim 6,
2 wherein the portal contents information stored in the portal contents
3 information storage apparatus is information regarding various websites
4 which can be accessed in advance through the portal site.

1 8. (Previously Presented) The portal site data providing device of claim 7,
2 wherein:

3 the portal specifying information receiving device is arranged to
4 receive website specifying information for selecting and specifying a website
5 displayed on the display device; and

6 the portal site data providing device comprises:

7 a portal screen data building device arranged for building a portal
8 screen data which shows display data related to an address data accessible
9 to the website selected and specified according to the website specifying
10 information, and

11 wherein the address data storage device comprises a portal screen
12 data storage device for storing the portal screen data built by the portal
13 screen data building device in the memory medium of the portable terminal
14 through the data reading/writing device.

1 9. (Previously Presented) The portal site data providing device of claim 7,
2 wherein:

3 the portal specifying information receiving device is arranged to
4 receive website specifying information for selecting and specifying a website
5 displayed on the display device;

6 the portal site data providing device comprises a portal information
7 transmitting device for transmitting the website specifying information as
8 the portal information to a portal managing server which manages portal
9 information of the user present on a network; and

10 the address data stored in the memory medium of the portable
11 terminal by the address data storage device is an address data accessible to
12 a portal site built by the portal managing server according to the portal
13 information transmitted to the portal managing server.

1 10. (Previously Presented) The portal site data providing device of claim 9,
2 wherein the portal information transmitting device is arranged to transmit
3 an identification data peculiar to a user, which is inputted through the
4 portal specifying information receiving device, to the portal managing server
5 by including it in the website specifying information.

1 11. (Previously Presented) The portal site data providing device of claim 9,
2 further comprising an identification data reading-out device for reading out
3 identification data peculiar to a user being stored in advance in a memory
4 medium from the memory medium of the portable terminal through the
5 data reading/writing device, wherein

6 the portal information transmitting device is arranged to transmit
7 the identification data read out by the identification data reading-out device
8 to the portal managing server by including it to the website specifying
9 information.

1 12. (Previously Presented) The portal site data providing device claim 5,
2 wherein the portable terminal is a GSM-type portable telephone, and the
3 memory medium of the portable terminal is a SIM card.

1 13. (Previously Presented) A method for supplying portal site data to a
2 portable terminal, the method comprising:

3 providing a portable terminal having a pre-stored unique ID and
4 having a reversibly removable memory medium;

5 providing a portal site managing system having a data
6 reading/writing device for reading from and writing to the reversibly
7 removable memory medium;

8 reading the ID from the portable terminal and transmitting the read
9 ID to the portal site managing system;

10 receiving a user-input portal site content specifying information
11 indicating a user selection from among a plurality of portal site content
12 options;

13 generating, in the portal site managing system a user-specified portal
14 site building information based, in part, on the user-input portal site
15 content specifying information;

16 storing in the portal site managing system the user-specified portal
17 site building information, the storing being retrievable based on a portal site
18 address data having the received ID;

19 storing, in the memory medium of the portable terminal the portal
20 site address data having the received ID, further comprising

21 removing the memory medium from the portable terminal and

22 mounting it to the data reading/writing device at least before the storing, in
23 the memory medium of the portable terminal, the portal site address data
24 having the received ID.

1 14. (Previously Presented) A method for supplying portal site data to a
2 portable terminal, the method comprising:
3 providing a portable terminal having a pre-stored unique ID and
4 having a memory medium;
5 providing a portal site managing system having a data
6 reading/writing device for reading from and writing to the memory medium;
7 reading the ID from the portable terminal and transmitting the read
8 ID to the portal site managing system;
9 receiving a user-input portal site content specifying information
10 indicating a user selection from among a plurality of portal site content
11 options;
12 building, in the portal site managing system a user-specified portal
13 site based, in part, on the user-input portal site content specifying
14 information;
15 storing in the portal site managing system the user-specified portal
16 site, the storing being retrievable based on a portal site address data having
17 the received ID; and
18 at least before the storing in the memory medium of the portable
19 terminal of the portal site address data having the received ID, a portable
20 terminal mounting step for mounting the portable terminal to the data
21 reading/writing device so that the data reading/writing device becomes
22 accessible to the memory medium.

15-19. (Canceled)

1 20. (Currently Amended) A computer program product comprising computer
2 executable instructions stored on a computer-readable storage medium
3 which, when executed by a ~~the~~ computer,

4 configure the computer to control a portal site data providing device
5 to read an ID from a portable terminal;

6 configure the computer to control a display of the portal site data
7 providing device to display portal site content options based, at least in part,
8 on the ID read from the portable terminal;

9 configure the computer to receive a user-input portal site content
10 specifying information indicating a user selection from among the displayed
11 portal site content options;

12 configure the computer to build a user-specified portal site based, in
13 part, on the user-input portal site content specifying information, including
14 configuring the computer to control a portal site building data storage device
15 for storing information for forming the portal site to be supplied to the
16 portable terminal and configuring the computer to control a portal
17 information storage device for storing portal information which selects and
18 specifies a website inputted by a user to the portal site data providing device
19 by receiving it from the portal site data providing device;

20 configure the computer to store the built user-specified portal site, the
21 storing being retrievable based on a portal site address data;

22 configure the computer to control the portal site data providing device
23 to write the portal site address appended with the ID into a memory of the
24 portable terminal; and

25 configure the computer to control a portal site information
26 distribution device for transmitting the information for displaying the built
27 portal site to the portable terminal.

21. (Canceled)
